Education

UNIVERSITY OF ILLINOIS URBANA-CHAMPAIGN (UIUC) — Champaign, IL
Expected May 2028

- Bachelor of Science in Computer Science + Philosophy (CS+X)
- Minor in Statistics
- GPA: 3.97/4.00 | Dean's List, Spring 2026
- Relevant Coursework: Data Structures, Linear Algebra, Statistics & Probability, Software Design Lab

Projects

Grade Predictor: Machine Learning Course Grade Prediction — ACM SIGAIDA, UIUC
Team Lead | Feb 2026 — May 2026

- Led a four-person team building an ML web app to predict UIUC course performance from approximately 76,000 historical course records.
- Cleaned and engineered features in Python and pandas, including GPA conversion, instructor aggregation, outlier filtering, and categorical encoding.
- Trained Random Forest and Gradient Boosting regressors with scikit-learn; the class-GPA model achieved 0.159 MAE on 15,227 held-out samples (79.2% within 0.25 GPA points).
- Integrated course- and student-level model outputs into the web app for personalized GPA, letter-grade, and course-difficulty estimates.

Low-Vision Navigation — ACM SIGAIDA, UIUC
Perception Team Member | Sep 2026 – Present

- Configured a CMake-based C++ project and integrated ONNX Runtime for a low-vision navigation system designed to help users avoid obstacles.
- Developed a C++ inference prototype to initialize model sessions, prepare input tensors, execute inference, and inspect output tensors.

Skyline 3: Traffic-Network Design — UIUC Team Project
Team Member | Sep 2026 – Present

- Prototyping an interactive road-network tool using React, TypeScript, Leaflet, and a Python FastAPI backend.
- Designed graph and GeoJSON representations of road intersections and segments, including geometry and traffic attributes.

Digital Diary: AI-Enhanced Journaling Application — ACM SIGCHI, UIUC
Team Member | Oct 2025 – May 2026

- Contributed friend-management, blocking, and privacy-controlled sharing features, including server-side visibility checks for private, friends-only, and public journal entries.

Skills

Languages: Python, C++, Java, JavaScript, TypeScript, Kotlin, HTML/CSS
ML & Data: pandas, scikit-learn, NumPy, Matplotlib
Development: React, FastAPI, Leaflet, ONNX Runtime, CMake, Git, GitHub
